## Product Data Sheet (PDS)

| Item no.  | Product name:                 |
|-----------|-------------------------------|
| 101010154 | Blanco Brillo 30X60 Rectified |

| Property declaration    |                     |
|-------------------------|---------------------|
| Format:                 | 30x60 cm            |
| Sorting:                | 1. sorting          |
| Material:               | Glazed ceramic tile |
| Water Absorbtion:       | <15%                |
| Fullbody:               | No                  |
| Glaze Hardness:         | PEI 1 - Only wall   |
| Frost Proof:            | No                  |
| Slip Resistance class:  |                     |
| Additional information: | Rectified           |

| Maintenance instructions |                                               |
|--------------------------|-----------------------------------------------|
| Deep cleaning:           | DeSalin C, or similar                         |
| First time treatment:    | No Treatment                                  |
| Daily cleaning:          | Surfatech Daglig rent, or similar             |
| Maintenance & care:      | No Treatment                                  |
| Inspection/control:      | Cosmetic                                      |
| Maintenance interval:    | This depends on wear and the desired surface. |

| Environmental impact     |                                         |
|--------------------------|-----------------------------------------|
| Recommended venting time | None.                                   |
| Eco-labeling:            | There is no eco-label for this product. |

| HSE-reference                                                                                                                                                                                     |  |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|
| See HSE FACTS regarding references to the Norwegian Labor Inspection Authority's publications. Special measures in case of fire extinguishing, temperature and / or humidity changes etc .: None. |  |

| Method of action for waste accoring to NS9431                                                                                                                                                                                                                   |  |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|
| Waste type: Clean masses. Waste management: Filling mass is delivered as clean masses.<br>Code for waste management: 1699 0700 0600 (code related to the municipality that handles the waste).<br>Other information: Recycling of this product is not relevant. |  |

| Supplier           |                                                                        |
